Hello principals,

Just a reminder that Hickory will support your school if you are working on green school certification. We will look over your school's submission, make suggestions, come up with projects, pay your re-certification fee, etc.

If your school is not a green school, we will work to help you attain that status. We would need a teacher or teachers at your school willing to start a green school team. Rebecca and I will help you get started from there.

Thanks,

Jason
